Meeting Notes 5/13

href=# is weird

fix conclusion

Take the javascript out of the xhtml (add event listeners in javascript tutorial)

    Not white ever

    Something should happen

    Introduce underlining?

Southern Baptist vs PC (USA)

    official positions that represent authoritative voice of specific groups

Find someone to talk to who knows something about this…

Markup is a mess

    -an is superfluous

  – do it as meta data (look at Russian fairy tale)

  – tokenize to separate things that have multiple people

Next Meeting:

    -Sunday morning at 9am via Skype djbpitt

For next time:

    -fix Mark as per sample

    -make the website less ugly (refactor javascript)

    -whose interpretations matter
